

Ohio Voter Survey Results: Vast majority of Ohioans favor penalties for distracted driving that are comparable to penalties for DUIs

QUESTION WORDING:
“Do you favor or oppose a law that would make the penalties for causing an accident due to driving while texting the same as the penalties for driving while intoxicated?”

The idea of subjecting distracted drivers to the same penalties as those levied for drunk and drugged driving is exceptionally popular with all segments of the voting public in Ohio. Although there were statistically significant differences by age group and gender, they were not substantial ones. It garnered support nearing or exceeding 70% for every major sub-group in the survey, indicating that it has a strong broad-based appeal among the electorate.

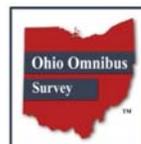

* Differences are not statistically significant

METHODS: This survey research data was gathered through telephone interviews that specially-trained interviewers Conducted with 801 randomly-selected Ohio voters with histories of voting in recent even-year November general elections or were recent new registrants, using a combination of valid residential, VOIP and cellular telephone listings. The interviews were performed during the period of January 16, 2018 through January 19, 2018. The overall estimated margin of sampling error is +/- 3.46%, based on a confidence level of 95%, although it varies for each individual question. This means that if this survey were repeated, 95 times out of 100 the results would be within plus or minus 3.46% of those provided herein. Adjustments were made to weight the results toward demographic and geographic characteristics of the state’s electorate, in order to account for under- and over-sampling that normally occurs as a result of the random selection process, and to ensure that all major sub-groups are represented in proportion to their actual percentages. Like all polls, this survey research is subject to other possible sources of error, such as unintentional bias in the wording of questions, data-entry error and nonresponse bias. Please note that this survey question was not funded or commissioned by any organization or committee. Permission is granted for distribution to share this information with any interested parties.
